IGERT Annual Workshop

Student Presentations 8:00 AM to Noon

Frey Computing Services Center 307
December 01, 2006 - 08:00 am

Abstract:
Student Presentations 8:00 AM to Noon IGERT on Computational Fluid Dynamics teaches Computational Fluid Dynamics as a fundamental discipline. The curriculum incorporates High Performance Computing and Grid techniques to prepare NSF funded IGERT scholars with the best possible competitive edge. Students and faculty from 10 disciplines collaborate on research problems that address Grand Challenge CFD problems. IGERT students also benefit from funding for mini-grants for research, travel awards, and the opportunity to study abroad and/or work as an intern in an industrial setting. They also gain professional guidance through community participation and ethical instruction. For more information on IGERT, visit: http://www.cct.lsu.edu/IGERT/

Refreshments will be served.
This lecture has a reception.
