On the Road to Greatness: Building a World Class Program in Information Technology and Cybersecurity Research**Jeff Moulton, Georgia Tech Research Institute**

Director of Programming Development and Information Operation

Energy, Coast, and Environment Building Dalton Woods Auditorium
April 28, 2014 - 04:00 pm**Abstract:**

N/A

Speaker's Bio:

Mr. Jeff Moulton is the Director of Program Development and Information Operations. He provides strategic direction and leadership and is responsible for focusing research, business development, building technical teams, and coordinating information operations across the university and institute. Mr. Moulton has in-depth experience within the intelligence communities assessing and defining corporate-level and globally deployable network security solutions. Mr. Moulton actively participates in numerous National and International Cyber Forums. Most notably he has been appointed to the ODNI/NSA Computational Cyber Security in Compromised Environments (C3E); the Secretary of the Air Force's Cyber Vision 2025 (CV2025) Committee; the AFCEA International Cyber Committee, and the IEEE Homeland Security Technologies (Cyber Panel) Committee.
