This document contains important information that was not included in the platform-specific or product-specific documentation for this release. This document supplements Oracle Database Readme.

This document may be updated after it is released. To check for updates to this document and to view other Oracle documentation, refer to the Documentation section on the Oracle Technology Network (OTN) Web site:

http://www.oracle.com/technology/documentation/

For additional information about this release, refer to the readme files located in the $ORACLE_HOME/relnotes directory.

---

**Note:** The Database Quick Installation Guides are no longer available in printed format. These documents are available with the media in the same location as the software and on Oracle Technology Network.

---

This document contains the following topics:

- Certification Information
- Unsupported Products
- Preinstallation Requirements
- Software Contents in the Installation Media Pack
- Installation, Configuration, and Upgrade Issues
- Other Known Issues
- Documentation Corrections and Additions
- Documentation Accessibility

## 1 Certification Information

The latest certification information for Oracle Database 11g Release 1 (11.1) is available on OracleMetaLink at:

http://metalink.oracle.com
ODBC Certification
Starting with Oracle Database 11g release 1 (11.1.0.7), Oracle ODBC driver is supported on HP-UX Itanium. ODBC driver uses gcc 3.4.5 for compilation instead of the native compilers on HP-UX Itanium operating systems.

2 Unsupported Products
A list of unavailable features and products is available in Section 2, "Features Not Available or Restricted in This Release", in Oracle Database Readme.

3 Preinstallation Requirements
Refer to the installation guides for the preinstallation requirements.

4 Software Contents in the Installation Media Pack
The media pack for this release consists for the following DVDs:

- For HP-UX PA-RISC:
  - Oracle Database 11g Release 1 (11.1.0.6.0) for HP-UX PA-RISC - This DVD contains the Oracle Database software, installation guides for each product installation type, such as Oracle Database, Oracle Database Client, Oracle Clusterware, and Oracle Real Application Clusters, Oracle Database Quick Installation Guide, Oracle Database Client Quick Installation Guide, and Oracle Database Release Notes for this HP-UX PA-RISC.
  - Oracle Database Documentation Library (11.1.0.6.0) - This DVD contains the documentation library for Oracle Database 11g.

- For HP-UX Itanium:
  - Oracle Database 11g Release 1 (11.1.0.6.0) for HP-UX Itanium - This DVD contains the Oracle Database software, installation guides for each product installation type, such as Oracle Database, Oracle Database Client, Oracle Clusterware, and Oracle Real Application Clusters, Oracle Database Quick Installation Guide, Oracle Database Client Quick Installation Guide, and Oracle Database Release Notes for HP-UX Itanium.
  - Oracle Database Documentation Library (11.1.0.6.0) - This DVD contains the documentation library for Oracle Database 11g.

5 Installation, Configuration, and Upgrade Issues
Review the following sections for information about issues that affect Oracle Database installation, configuration, and upgrade:

- Latest Upgrade Information
- Error in Copying Files While Upgrading Oracle Database 10g Release 2 to Oracle Database 11g
- Oracle Enterprise Manager Configuration Fails During Dataguard Rolling Upgrade
Oracle Universal Installer Displays Single Instance Install Option for Oracle RAC

Restarting the Listener for the Remote Node Displays an Error

The /etc/oratab File Lists Multiple Automatic Storage Management Instances

Installation, Configuration, and Upgrade Issues on HP-UX PA-RISC

Oracle Universal Installer Warnings

5.1 Latest Upgrade Information
For late-breaking updates and best practices about preupgrade, post-upgrade, compatibility, and interoperability discussions, refer to Note 601807.1 on OracleMetaLink (https://metalink.oracle.com/) that links to "Oracle 11g Upgrade Companion" page.

5.2 Error in Copying Files While Upgrading Oracle Database 10g Release 2 to Oracle Database 11g
When you start upgrading second node from Oracle Database 10g Release 2 to Oracle Database 11g, an error message is displayed while copying files during the upgrade process.

Workaround: Run the upgrade session from the node on which you initially installed Oracle RAC.

This issue is tracked with Oracle bug 6501871.

5.3 Oracle Enterprise Manager Configuration Fails During Dataguard Rolling Upgrade
When performing Dataguard rolling upgrade from Oracle Database 10g Release 2 (10.2.0.3) using Oracle Database Upgrade Assistant, Oracle Enterprise Manager displays an error message.

This issue is tracked with Oracle bug 6594642.

5.4 Oracle Universal Installer Displays Single Instance Install Option for Oracle RAC
When installing Oracle RAC using Oracle Universal Installer downloaded from Oracle Technology Network (OTN), it displays the Select Installation Method screen with Basic Installation and Advanced Installation options. This screen is specific to single instance installation. For Oracle RAC installation, the Select Installation Type screen should have been displayed.

Workaround: Continue with the installation by selecting Advanced Installation and clicking Next. Oracle universal Installer displays the Select Installation Type screen. Proceed with the rest of the Oracle RAC installation, as usual.

Note: This issue does not occur if you install Oracle RAC from the purchased product, such as the hard media or download the product from Oracle Electronic Product Delivery (EPD).
This issue is tracked with Oracle bug 6412150.

5.5 Restarting the Listener for the Remote Node Displays an Error

If you perform custom installation to install additional components in an existing Oracle RAC database home on Oracle Clusterware, then Oracle database instance and listeners are not started after the installation is complete. You can run the `Oracle_home/bin/srvctl` command to display the status of Oracle database instance and listeners. When you try to start the listener for the remote node, the following error message is displayed:

TNS-01151: Missing listener name, LISTENER_NODE_NAME, in LISTENER.ORA

**Workaround:** Complete the following procedure for the remote nodes on which the listener displayed an error message:

1. Note the list of nodes on which the additional component installation is being performed. Write down the list of nodes selected in the Node Selection Page in Oracle Universal Installer.

2. For each node selected in step 1, use the following command to backup `Oracle_home/network/admin` to `Oracle_home/network/admin.orig` before proceeding with the installation:
   ```bash
   $ cp -R Oracle_home/network/admin Oracle_home/network/admin.orig
   ```

3. For each node selected in step 1, use the following command to restore `Oracle_home/network/admin.orig` to `Oracle_home/network/admin` after completing the installation:
   ```bash
   $ cp -R Oracle_home/network/admin.orig Oracle_home/network/admin
   ```

4. Run the following command on local node for each nodes selected in step 1:
   ```bash
   $ Oracle_home/bin/srvctl start listener -n node_name
   ```

5. If the Oracle Database instance for the remote node is down because of the listener, then start the Oracle database an instances that are down using the following command:
   ```bash
   $ Oracle_home/bin/srvctl start database -d database_name
   ```

This issue is tracked with Oracle bug 6412150.

5.6 The /etc/oratab File Lists Multiple Automatic Storage Management Instances

If you install Oracle Clusterware on share Oracle home, the `/etc/oratab` file lists multiple Automatic Storage Management instances.

**Workaround:** Oracle Universal Installer detects this issue during the pre-requisition checks. You can either edit the `/etc/oratab` file or ignore the error during installation.

The issue is tracked with Oracle bug 5942123.
5.7 Installation, Configuration, and Upgrade Issues on HP-UX PA-RISC

The following is HP-UX PA-RISC specific issue that affects Oracle Database installation, configuration, and upgrade:

---

**Note:** The issues mentioned in this section are observed only on HP-UX RA-RISC.

---

5.7.1 Oracle Database Configuration Assistant and Oracle Database Upgrade Assistant Fail to Start

When installing Oracle Database 11g (11.1.0.6.0) software with create or upgrade database option, Oracle Database Configuration Assistant and Oracle Database Upgrade Assistant fail to start and Oracle Universal installer displays the OUI-25301 error message.

When running Oracle Database Configuration Assistant or Oracle Database Upgrade Assistant after the installation, the following error message is displayed:

`java.lang.UnsatisfiedLinkError: $ORACLE_HOME/lib/libOsUtils.so`

This issue is noticed only on HP 9000/700 workstations.

**Workaround:** To resolve this issue, complete the following procedure before starting Oracle Universal Installer, Oracle Database Configuration Assistant, or Oracle Database Upgrade Assistant:

1. Run the following command to set the `JAVA64FLAG` variable:
   
   ```
   $ export JAVA64FLAG="-d64"
   ```

2. Start Oracle Universal Installer, Oracle Database Configuration Assistant, or Oracle Upgrade Assistant.

This issue is tracked with Oracle bug 6628285.

5.8 Oracle Universal Installer Warnings

If you encounter the following Oracle Universal Installer warning when you are installing Oracle Database 11g, then you can ignore them:

- If you have installed a compiler version later than the one listed in Oracle database prerequisite checks, then the Oracle Universal Installer displays a non compatibility warning message. This message can be ignored, if the newer versions of the compilers installed are displayed on the vendors site.

- ANSI/C is one of the certified compiler for Pro* C/C++, Oracle Call Interface, Oracle C++ Call Interface and Oracle Xml Developers Kit. If you have installed other certified compilers, then you can ignore the warning message.

6 Other Known Issues

The following sections contain information about issues related to Oracle Database 11g and associated products:

- Location of the Memory Mapped Files
6.1 Location of the Memory Mapped Files

When a PL/SQL unit is compiled using `PLSQL_CODE_TYPE=NATIVE` in Oracle Database 11g, the resulting machine code is loaded into an operating system shared memory object before it is copied to the database catalog. Additionally, when the native code is fetched from the catalog for execution, it is first loaded into a shared memory object. On HP, these shared memory objects are memory mapped files, which are staged in a directory automatically created by Oracle under the `dbs` subdirectory of the directory specified by the environment variable `ORACLE_HOME`. If you need to change the location of the staging directory, contact Oracle support.

6.2 Reactivate the OC4JADMIN User for Oracle Ultra Search

The `OC4JADMIN` user is deactivated during the Oracle Database 11g installation process. After the installation is complete, you must modify the `$ORACLE_HOME/oc4j/j2ee/OC4J_SEARCH/config/system-jazn-data.xml` file. Replace the following content of the file:

```xml
<user deactivated="true">
  <name>oc4jadmin</name>
  <display-name>OC4J Administrator</display-name>
  <description>OC4J Administrator</description>
</user>
```

with:

```xml
<user>
  <name>oc4jadmin</name>
  <display-name>OC4J Administrator</display-name>
  <description>OC4J Administrator</description>
</user>
```

Use the following commands to restart the Oracle Ultra Search middle tier in the Oracle Database:

```bash
$ $ORACLE_HOME/bin/searchctl stop
$ $ORACLE_HOME/bin/searchctl start
```

6.3 Oracle Clusterware Node Addition in Vendor Cluster Environment

When adding a node to the Oracle Clusterware in a vendor cluster environment that uses host names with fully qualified domain names, the `rootaddnode.sh` utility displays the following error message:

```
PRKO-2006 : Invalid node name: NODE_NAME
```

Workaround: For each node that is being added to the Oracle Clusterware, run the following command:

```bash
srvctl add nodeapps -n node_name_without_fully_qualified_domain_name -A node-vip/netmask/Interfaces
```
6.4 Remote Copy Error On HP-UX Itanium

When you upgrade Oracle Clusterware 10g Release 2 (10.2.0.4) to Oracle Clusterware 11g Release 1 (11.1.0.6), some of the directory transfer to remote nodes may fail.

Workaround: Execute the following commands on all nodes after installing Oracle Clusterware 10.2.0.4 and before installing Oracle Clusterware 11.1.0.6:

```bash
mv $OH/jdk/jre/javaws/javaws $OH/jdk/jre/javaws/javaws.orig
ln -s $OH/jdk/jre/javaws/javaws.orig $OH/jdk/jre/javaws/javaws
```

After running preupdate.sh on the nodes to be upgraded, perform the following steps on each node before installing Oracle Clusterware 11.1.0.6:

1. Check if `$ORACLE_HOME/lib/libskgxn2.so` is link or real file
2. If `$ORACLE_HOME/lib/libskgxn2.so` is a link, then perform the following:
   a. `cp libskgxn2.so libskgxn2.so.tmp`
   b. `rm libskgxn2.so`
   c. `mv libskgxn2.so.tmp libskgxn2.so`
   If `$ORACLE_HOME/lib/libskgxn2.so` is a real file, then no action is required.
3. Repeat steps 1 and 2 for `$ORACLE_HOME/lib32/libskgxn2.so`

This issue is tracked with Oracle bug 6941657.

7 Documentation Corrections and Additions

None
8 Documentation Accessibility

Our goal is to make Oracle products, services, and supporting documentation accessible, with good usability, to the disabled community. To that end, our documentation includes features that make information available to users of assistive technology. This documentation is available in HTML format, and contains markup to facilitate access by the disabled community. Accessibility standards will continue to evolve over time, and Oracle is actively engaged with other market-leading technology vendors to address technical obstacles so that our documentation can be accessible to all of our customers. For more information, visit the Oracle Accessibility Program Web site at http://www.oracle.com/accessibility/.

Accessibility of Code Examples in Documentation

Screen readers may not always correctly read the code examples in this document. The conventions for writing code require that closing braces should appear on an otherwise empty line; however, some screen readers may not always read a line of text that consists solely of a bracket or brace.

Accessibility of Links to External Web Sites in Documentation

This documentation may contain links to Web sites of other companies or organizations that Oracle does not own or control. Oracle neither evaluates nor makes any representations regarding the accessibility of these Web sites.

TTY Access to Oracle Support Services

Oracle provides dedicated Text Telephone (TTY) access to Oracle Support Services within the United States of America 24 hours a day, seven days a week. For TTY support, call 800.446.2398. Outside the United States, call +1.407.458.2479.
